

Office Order

Real time Digitization in Mobile and Web Applications

The digitization of data is to be ensured in real time for its utilization in decision making and policy making. It is being directed to digitize the data in the apps and portals available for all thematic interventions in real time.

Earlier, it was communicated through office order #BRLPS/Proj-MIS/71526/2023 dated 02.08.23 for digitization of data, after which significant improvement has been seen but still lag persist. The lag in data digitization needs to be covered within a week time in the apps and portals.

Currently, in few initiatives the data is still being reported manually. It is being instructed to get the initiative digitised through mobile or web applications.

MIS theme at SPMU to ensure technical support in all apps and applications.

(Himanshu Sharma)
CEO-cum-State Mission Director
